

CRYOVAC®

BRAND FOOD PACKAGING

CRYOVAC® Brand Barrier Formable Paper

Lower your environmental footprint with CRYOVAC® brand Barrier Formable Paper bottom web. This innovative solution is made from renewable fiber and uses 76% less plastic*.

BENEFITS

Operational Efficiency

- Designed to perform on a wide range of rollstock, thermoforming, and vacuum skin packaging equipment
- Offers a more sustainable and easy to use option without compromising throughput
- Compatible with vacuum skin packaging (VSP) and modified atmosphere packaging (MAP) top films

Product Integrity

- Exceptional oxygen and moisture barrier properties for extended shelf-life
- Engineered to provide robust product protection when paired with CRYOVAC® brand top webs
- Minimize cross contamination risk with a virtually leak-proof package

Brand Experience

- Maintains optimum taste, moisture, freshness and texture to ensure consumers have a consistent eating experience
- Natural feel and appearance for improved shelf appeal and consumer satisfaction
- Leverage printing and design opportunities for improved brand awareness
- When paired with CRYOVAC® brand Darfresh® film, the finished product can be vertically merchandised with no product movement
- Delivers consistent performance to drive brand loyalty
- Available with proprietary easy-open sealant for added consumer convenience
- Tamper evident packaging for added security

CHALLENGE

You are continually looking for ways to lower your environmental footprint while keeping your product fresh. Providing a solution to help solve these challenges is the key to your success.

SOLUTION

CRYOVAC® brand Barrier Formable Paper is our latest offering in paper-based sustainable solutions. Made from 90% paper, this innovative formable bottom web offers superior barrier protection while reducing the amount of traditional plastic used without compromising shelf-life or product protection.

Engineered to work with both MAP and VSP top webs, CRYOVAC® brand Barrier Formable Paper is the ideal solution to give consumers the sustainability they want with the protection and versatility you need.
