BRAND PACKAGING

# Bubble Wrap® Inflator

## On-Demand Inflatable Packaging System

The Bubble Wrap® Inflator transforms your operation for the better to optimise labour, meet growing and changing business needs, and increase operational efficiency.

### OPTIMISE LABOUR RESOURCES

Ready to use on day one, this plug-and-play system is easy to operate and integrates with your current operation to start inflating immediately. The simple user interface gives operators the confidence to use the system with little to no training. Preventive maintenance alerts will also notify you when it's time to service your machine.

### VERSATILE

The Bubble Wrap® Inflator runs a range of materials for cushioning or wrapping applications.

The system can be installed in multiple ways to save space — on a bench, wall or existing pack station. A range of accessories are also available to further improve efficiency.

### INCREASE OPERATIONAL EFFICIENCY

Reduce downtime with a reliable system made for your packaging needs. The system produces cushioning at speeds up to 24 metres per minute. Fast inflation of packaging materials makes your packers more efficient, fulfilment lines more productive, and gets more packs out the door on time. The on-demand inflation system also saves on warehouse space.

### COMPACT AND LIGHTWEIGHT

The system is designed for smaller space operations with 52% less space than other on-demand inflation systems by SEE, allowing for an easier fit in work cells where space is at a premium.

### SPECIFICATIONS

**Table top model dimensions  
(without material roll)**  
L 43.2cm x W 30.5cm x  
H 54.6cm

**System Weight**  
12.7 kg

**Electrical**  
Universal Input: 110V to 240V  
VAC, 50/60 Hz  
Power Consumption: 1800  
Watts (VA) max

# Bubble Wrap<sup>®</sup> Inflator

Different mounting options and accessories available

Simple user interface is easy to use

Preventive maintenance alerts when service is due

Compact performance saves pack station space

Inflates a broad range of BUBBLE WRAP<sup>®</sup> brand inflatable bubble materials

## SUSTAINABILITY

- Using an on-demand inflatable material that is shipped flat reduces freight costs and the number of trucks used in transporting materials, when compared to ready-inflated or bulkier packaging materials.
- The Barrier Bubble of the inflatable films retains the air during the shipping cycle and warehousing. It provides good cushioning performance, reducing damage and increasing re-usability.
- The Bubble Wrap IB<sup>®</sup> films are compatible with mechanical recycling streams of LDPE and recyclable\* in many locations.

*\*Degree of recyclability of the final package depends on the specific product configuration or components intended for recycling and the scope and availability of appropriate local recycling facilities.*

## TYPICAL APPLICATIONS

The combination of its small footprint and variety of accessories allows this system to be used in a broad range of markets and packing environments, from ship-from-store to e-commerce fulfilment centres.
