BRAND AUTOMATED SYSTEMS

600™

Large bag packing machine

Automatic bag sealing system designed for medium to large products

FEATURES AND BENEFITS

- Capable of cycling at speeds up to 65 bags per min
- For applications that require large bags (up to 400 mm wide).
- Touch screen accesses operator tutorials, help and diagnostics.
- The system can be networked for full pack station integration to facilitate central monitoring and the extraction of productivity information.
- Capable of being configured for left or right-hand access.
- The system features a simple design with very few moving parts, reducing lifetime cost and improving uptime.
- Easily integrates with inline printers, counters, scales and conveyors for semi to fully automatic bagging
- Height adjustment and casters for ergonomics and portability.

SPECIFICATIONS

Weight	185 kg
Overall Size	H: 943 to 1196 mm
	W: 1057 mm
	L: 1765 mm
Electrical	110/240 VAC, 50/60 Hz, 500 Watts (VA) max
Air Feed	5 CFM/80 psi of clean, dry air
Pass-through	150 mm max
Bag thickness	35-100 µm
Bag widths	100-400 mm
Bag lengths	140-680 mm
Weight capacity	Up to 2.2 kg (with load shelf)

TYPICAL APPLICATIONS

Aerospace

Automotive

Cosmetics

Electronic

Healthcare

Home Goods

Plumbing

SUSTAINABILITY

As a maker of flexible packaging products, we recognise the need for greater awareness and involvement in creating a more sustainable planet – from the point of manufacture to the point of disposal.

For over a decade, we have been producing environmentally responsible products for our customers. We introduced GeoTech®, a line of pre-consumer reprocessed films that forever changed the packaging industry. We have introduced innovative, lighter gauge films that reduce the amount of material required without compromising packaging performance. In addition, our machinery technology continues to evolve with new, state-of-the-art components and engineering designed to reduce energy consumption.
