

A PRODUCT OF AUTOMATED PACKAGING SYSTEMS

EZ-Tear™ *Makes Packing Easy & Efficient*

AirPouch® air pillows and block and brace tubes and twin pillows feature our patented EZ-Tear™ perforations, which require 80% less effort to pull and separate than similar packing materials. Wrapping and packing is faster and more efficient with the EZ-Tear design.

EZ-Tear makes it simple for packers to quickly tear off the exact amount of material they need for faster packing productivity. A pre-opened slit between each component allows the operator to easily grasp and separate the materials.

A Better Packing Option

AirPouch products provide excellent protection, increased product visibility, and reduced shipping costs when compared to conventional protective packaging materials. The EZ-Tear perforation allows more air into each pillow, which maximizes yield and minimizes cost per cubic foot.

A PRODUCT OF AUTOMATED PACKAGING SYSTEMS

Testing Proves It!

A third party testing company evaluated products from the top four protective packaging manufacturers to determine the amount of pull force needed to separate air pillows across the entire width.

Results

- AirPouch Pillows:** 5.84 lbs. force
- Competitor #1:** 14.11 lbs. force
- Competitor #2:** 14.11 lbs. force
- Competitor #3:** 23.60 lbs. force
