GRIP AND TEAR™ BAG BENEFITS

- Combines superior shrink and toughness without compromising oxygen-barrier properties
- Ideal for use with a variety of non-abrasive applications, including fresh red meat, whole chickens, deli meats, and cheese
- The only easy open end-seal bag available in widths from 5½ inches to 18 inches
- Enhanced toughness means better performance without the threat of material punctures under normal distribution handling
- Safer, easier option for foodservice and deli counter employees
- Research shows consumers prefer Grip and Tear™ bags for cheeses, fresh meats, poultry, and smoked and processed products – the bags keep everything from hands to countertops cleaner and more sanitary
- Offers possible down-gauging opportunity for processors using heavier gauge bags for slightly more abusive products
- Runs on existing Cryovac® rotary chamber vacuum systems

And that's not all.

When you choose a Cryovac® packaging system, you get more than proven and consistent automated loading and packaging equipment. You get more than state-of-the-art packaging materials like case ready and active packaging technologies, Simple Steps® easy meal prep products, and Flavour Mark™ shelf-stable pouches. And more than scientists, engineers, and applications specialists who create solutions that fit your needs, or technical service specialists to help keep you up and running.

No, a Cryovac packaging system is much more than a system. It's a total solution. And it's a committed partner.
