

## **Shanklin** GT-71 Shrink Tunnel

### **New High Speed Tunnel Combines Versatility, Technology and Performance**

Advanced Temperature Control, Variable Air Velocity and Dual-Directional Conveyor Drive Provide Improved Shrink Package Appearance and Application Flexibility

- Chamber Temperature Control within +/- 1 Degree
- Variable Speed AC Main Blower
- Dual-Speed, In-Chamber Fans
- Dual-Directional Conveyor Drive Permits Right-to-Left or Left-to-Right Production Flow
- Global Platform – Metric Fasteners – Designed for CE Compliance
- Left and Right Chamber Viewing Windows
- Reduced Energy Consumption

# GT-71 Shrink Tunnel

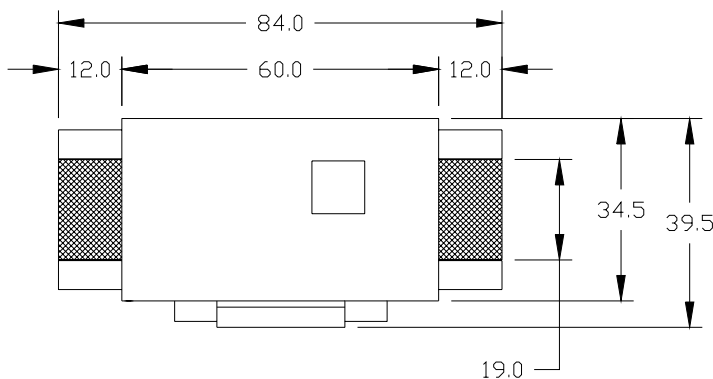

- **Temperature Control** – Digital controller and software hold chamber temperature to +/- 1 degree. The temperature control system actively monitors chamber conditions and automatically optimizes the heater on/off sequence.

Combined with the in-chamber, dual-speed fans, the system provides consistent, even temperature throughout the tunnel chamber resulting in optimal package appearance.

- **Dual-Directional Conveyor Drive** – Conveyor drive may be wired and/or relocated for right-to-left or left-to-right production flow for ease of operation with all Shanklin wrapper configurations.
- **Chamber Viewing Windows** – Product viewing windows are installed on both sides of the chamber to provide greater feedback for adjustments to the shrink process. Windows are easily removable for servicing the tunnel chamber.
- **Reduced Energy Consumption** – New air velocity design, lower wattage heaters and increased insulation result in lower energy consumption.

GT-71 Plan View

GT-71 Specifications

	Model GT-71
<b>Tunnel Passage</b>	12" high x 22" wide x 60" long
<b>Tunnel Size</b>	39.5" wide x 68 1/2" high x 84" long
<b>Conveyor Height</b>	29" minimum, 42" maximum
<b>Power</b>	230V, 3 phase, 49 amps 11.5 KVA max (6 KVA normal usage)
<b>Conveyor Speeds</b>	Variable to 140 ft/min
<b>Blower Motor</b>	3/4 hp, 3 phase
<b>Heaters</b>	Multiple finstrip (encased element)
