Freight Policy - Protective

Version Control No: 2.0

Effective Date: August 14, 2023

Sealed Air offers a range of freight options that enable the delivery of product from our facilities to our customers facilities within the United States and Canada. This document outlines the standard freight policy for Protective customers in the United States and Canada.

This document summarizes Sealed Air's freight policy and is organized as follows:

Contents

General Freight Considerations/Definitions	2
Freight Terms by Product Group – Bulky Items	4
Freight Terms by Product Group – Dense Items	5
Freight Terms by Product Group – Instapak® Items.....	6
Freight Terms by Product Group – Other items	7

General Freight Considerations/Definitions:

Prepaid Freight:

On some product lines, Sealed Air offers prepaid freight on condition that the order complies with the freight policy outlined in this document.

Customer Paid:

The customer is responsible for all freight charges on the order. We offer several options for customer paid freight:

Pre-Pay and Invoice:

Sealed Air will ship the product on one of our preferred carriers and the customer will see the freight charge on their final invoice.

Third-Party Bill:

The customer can specify that a third-party will pay the freight charges and provide the third-party party's shipping account information for billing. Orders will not ship without third-party account information.

Collect:

The customer can select this option and remit shipment charges directly to the carrier.

Next Day or Second Day Air:

Customers can select this option if they provide their carrier account information at the time of order entry.

Pick Up:

Only available in locations where the product on order is inventoried. Contact your Customer Service Representative at 1-877-722-3741 for more information.

Pool Truck:

Available in limited locations and must be pre-approved for access. Contact your Channel Manager for more information.

Drop-Ship Service:

Sealed Air offers a drop-ship service that will deliver products directly to end users on behalf of channel partners. These orders will be shipped according to the Freight Terms by Product Group outlined in this document.

Freight Item Types:

Bulky items – these items cube out the truck easily and are typically lightweight, e.g., BUBBLE WRAP[®] Cushioned Rolls, Cell-Aire[®] Packaging Foam, Mailers, Specialty Foam and Converted Paper products.

Dense items – typically palletized items that weigh out before they cube out, e.g., Shrink products, BUBBLE WRAP[®] IB, NewAir IB, Paper products, etc.

Note: Generally, bulky items are not combinable with dense items to meet free freight requirements.

Minimum Order Requirements (MOQs):

All orders are subject to the MOQs requirements outlined in the [product and service offer](#). Conflicts between the freight policy and the MOQs policy should be rare, but if a conflict exists, the order will be adjusted appropriately to comply with the MOQs policy and ensure that the truck is not overfilled.

Load Last:

For bulky items, the customer will be required to specify a “load last” item on the order. If the truck is overfilled, and the entire order cannot ship together, the selected item will be removed from the shipment and the order marked as complete. The customer will only be invoiced for the product loaded onto the delivery truck.

Lead Times (Order to Delivery):

When items of varying lead times are added to an order to meet a prepaid freight requirement, the longest lead time item within the order will determine the delivery date at order confirmation.

Changes to Orders (Add-Ons, Deletions, Other Changes):

Any adjustments to the order (addition or removal of product) could impact the delivery date or result in freight charges to the customer (if the order no longer meets the prepaid freight requirements). Order may also be subject to expedite fees if the request results in a lead time that is shorter than what is communicated as the “current state” lead time in the product and service offer document.

Delivery appointments:

If a customer notates on their order that a delivery appointment is required, our logistics team will make their best effort to contact the customer; however, failure for the customer to respond in time will result in delivery delays.

Carrier Selection:

Sealed Air reserves the right to determine the freight carrier on orders that meet prepaid or prepay and invoice criteria.

Full Truckload:

Typically implies a 53-foot dry van trailer, however, certain products may require specialized trailers during warmer months or to meet DOT requirements.

Full Truckload Calculator:

Sealed Air will make truck cube fill available digitally in the cart/checkout process on MySEE. Instructions/guides on how to use this tool will be available on the portal. We encourage customers to leverage this tool to ensure that their orders comply with the freight policy before submitting their orders.

Shipments from the US to Mexico:

Sealed Air does not ship products from US plants into Mexico. The customer will be responsible for managing transit across the US – Mexico border.

Shipments from the US to Canada:

Sealed Air will ship products from US Plants into Canada subject to international/customs compliance requirements. Please contact Customer Service at 1-877-722-3741 for more information.

Returns:

Returns, damages, or rejections are subject to approval by Sealed Air. Please contact a Customer Service Representative at 1-877-722-3741 before returning or rejecting any items. If a return is approved, the process will be handled by a Sealed Air carrier as directed by Sealed Air Transportation through Customer Service. If the customer is found to be at fault for the damage/claim, the return will not be approved. If there is damage or missing items in the shipment, **please note** this on the delivery receipt and have the driver sign. Sealed Air will facilitate necessary freight claims for prepaid shipments from Sealed Air.

Freight Terms by Product Group – Bulky Items

Major Product Group	Product Type	Products*	Freight Policy
