In today's high demand world, your operational performance is everything; it's what makes or breaks your bottom line. However, providing a solution that not only improves your operational efficiencies but also meets the growing needs of your customers is now more than ever the key to your success.

**CRYOVAC® brand FS Series film** creates many advantages compared to cans and rigid containers, including more efficient storage, safer handling, and easier opening. These flexible pouches can be used for a variety of hot and cold products such as sauces, soups, side dishes, vegetables in brine, and raw and cooked meat and poultry.

**BENEFITS**

- **Operational Efficiency**
  - Offers nearly 100% product yield
  - Significantly reduces shipping weight compared to #10 cans
  - Increased storage savings compared to rigid containers
  - Robust to an array of product temperature conditions
  - Approved for immediate chilling or freezing for distribution upon packaging

- **Product Integrity**
  - Available in a wide range of barrier properties to help protect and extend product life
  - Seals effectively through a wide range of product contamination
  - Superior protection against puncture and abrasion
  - Excellent product integrity through frozen distribution cycles
  - Can go directly from frozen storage to boiling water for reheating of contents, helping reduce cross contamination

- **Brand Experience**
  - Maintain optimum taste, moisture, freshness and texture to ensure consumers have a consistent eating experience
  - Delivers consistent performance to drive brand loyalty and sales
  - Allows for surface printing of up to 10 colors for ideal product display for retail or food service applications
  - Easy open tear initiation notch available for added convenience

**CHALLENGE**

In today's high demand world, your operational performance is everything; it's what makes or breaks your bottom line. However, providing a solution that not only improves your operational efficiencies but also meets the growing needs of your customers is now more than ever the key to your success.

**SOLUTION**

CRYOVAC® brand FS Series film creates many advantages compared to cans and rigid containers, including more efficient storage, safer handling, and easier opening. These flexible pouches can be used for a variety of hot and cold products such as sauces, soups, side dishes, vegetables in brine, and raw and cooked meat and poultry.

Our FS Series film provides improved quality, food safety and increased shelf life - all in a package with 40 percent less storage volume than cans and with virtually 100 percent product yield.

*Shown: Easy dispensing in food service application*
FS Series Film

SUSTAINABILITY

- A wide range of CRYOVAC® Brand FS Series films are Designed for Recycling (D4R)* and approved for labelling as RIC #4, polyethylene (PE)**. These films have demonstrated compatibility with the PE flexibles mechanical recycling stream.

*(Sealed Air utilized procedures to test packaging materials for recyclability following international protocols published by both the Plastic Recyclers Europe (PRE) and the Association of Plastics Recyclers (APR) for benchmark testing of flexible plastic packaging.)*

MATERIAL

- Available in an assortment of gauges, colors and permeabilities
- Suitable for both cold and hot fill applications, ambient, chilled or frozen distribution

EQUIPMENT

- Runs on vertical form-fill-seal (VFFS) equipment

APPLICATIONS

- Ideal for a variety of hot and cold filled pumpable foods and beverages

* Degree of recyclability will vary depending on scope and availability of collection and recycling programs
** RIC: Stands for Resin Identification Code. For Example: RIC 4 represents PE material
