# Rocket<sup>®</sup>

Inflatable Packaging System

Our Fastest Inflatable Void Fill System

Introducing the Rocket® inflatable void fill system, a void fill solution designed specifically to meet the needs of modern fulfilment. Drawing on decades of inflatable void fill experience, the Rocket® system is fast, simple, light and prepared for your packaging operations.

# A HOST OF PERFORMANCE ENHANCING FEATURES

# **HIGH SPEED**

- 30 metres of inflated void fill cushions per minute - high productivity for demanding environments
- Quick start creates bags instantaneously, operating at maximum capacity the moment it is turned on
- Cross seal identification sensors enable to stop and start automatically on a cross seal every time, optimising bag fill for consistent protective performance
- Automated tracking control eliminates the need for manual adjustment providing consistent inflation
- Packaging-on-demand various delivery options available: material batched into bins, delivered with a Jet Stream® or with a Rocket dispensing system; height adjustable with a lifter to multiple packers increasing packaging output and improving efficiency
- Auto-replenishment sensor maintains a consistent supply of material

\*Degree of recyclability will vary depending on scope and availability of flexible film collection, sortation and recycling programs.

#### SIMPLIFIED OPERATION

- Small and light easy to install in a variety of packaging line configurations
- Easy to use simply plug in and load the film to begin
- Patented edge seal technology with ambient temperature sensing - gives a perfectly sealed bag
- Quiet mode option reduces operational noise levels

### **REUSABLE AND RECYCLABLE\***

The superior sealing technology and material strength of our packaging makes it highly reusable. Our packaging is recyclable\* and loses 99% of its volume when deflated. It also provides a reduced equipment footprint.

# **VERSATILE FILM OPTIONS**

AirWrap, Extreme®, Extreme Heavy Duty and Extreme Efficiency® films are available in three widths (200mm, 250mm and 300mm) and can be converted to three different cushion lengths (75mm, 130mm and 200mm) creating nine possible cushion sizes.
