BUBBLE WRAP® **Brand Universal** **Inflation System**

BWI-1001

Disruptive technology shouldn't disrupt your operation. The BUBBLE WRAP® brand universal inflation system is the new industry-leading inflator that will immediately transform your operation for the better to optimize labor, meet growing and changing business needs, reduce packing errors, and increase operational efficiency.

This all-in-one system gives you the power to choose between a range of BUBBLE WRAP® brand materials such as inflatable cushioning, pouches, or air pillows with only a single piece of equipment.

OPTIMIZE LABOR RESOURCES

Ready to use on day one, this plug-and-play system is easy to operate and integrates with your current operation to start inflating immediately. The simple user interface gives operators the confidence to use the system with little to no training required. Preventive maintenance alerts will also notify you when it's time to service your machine.

HIGHLY VERSATILE

This universal inflation system runs over 80 types of materials for void fill, cushioning, or wrapping applications. With only one piece of equipment, you can effortlessly switch from one material type to another based on your needs.

The combination of its small footprint and variety of accessories allows this system to be used in a broad range of markets and packing environments, from ship-from-store to e-commerce fulfillment centers. The system can be mounted in multiple ways to save space — table-top, floor stand with winder, and wall mount options are available.

ERROR-FREE WITH SMART TECHNOLOGY

By simply placing a new roll of film on the machine, smart technology automatically detects and configures the machine to the right seal temperature, airflow, and pressure based on the material loaded, eliminating the need for operator programming. Smart technology alleviates the need for operator interaction and reduces the risk of operator error, which helps with quality control and mitigates consumer complaints.

INCREASE OPERATIONAL EFFICIENCY

Reduce downtime with a reliable system made for maximum throughput. The BUBBLE WRAP® brand universal inflation system produces cushioning at speeds up to 80 linear feet per minute. Faster inflation of packaging materials makes your packers more efficient, fulfillment lines more productive, and gets more packs out the door on time.

COMPACT AND LIGHTWEIGHT

This new system requires 52% less space than other on-demand inflation systems by Sealed Air, allowing for an easier fit in work cells where space is premium. It's also 53% lighter and up to 20% quieter than other competitive systems.

MOUNTING OPTIONS

- Table-top
- Floor stand with winder
- Wall-mount

SYSTEM ACCESSORIES

- Foot switch
- Overhead inflatable dispenser
- Auto bin loading
- Inflatable material insertion system

SPECIFICATIONS

Dimensions

(Base system without stand(s) or winder)

17 1/8 in L x 14 1/8 in W x 14.5 in H

Weight

28 lbs

Electrical

Universal Input: 110V to 240V VAC, 50/60 Hz

Power Consumption: 1800 Watts (VA) max

Air

5 CFM/80 psi of clean, dry air
