

Fill-Air® Flow

On-Demand Inflatable
Void-Fill Packaging System

Accessible
Technology for
Shipping From
Anywhere

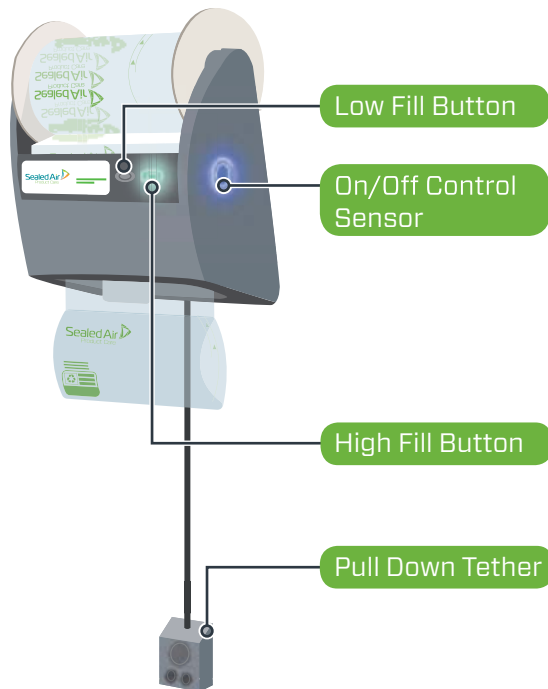

4-FEATURE SYSTEM OPERATION

ON/OFF CONTROL SENSOR: Swipe hand over sensor to produce the number of bags needed. (1 swipe = 1 bag; 2 swipes = 2 bags).

100 BAG BATCH FEATURE: Hold hand over sensor for 3 seconds to inflate 100 bags.

FILL BUTTON: Touch button to choose between low or high inflation for void fill.

TETHER AUTO REPLENISHMENT: Produces up to 3 feet of bags when extended into position.

A Solution Tailored For Businesses of All Sizes

When your business requires moving a wide range of SKUs out the door fast, overpacking, inefficient workspaces, and redundant practices can derail productivity. Solve these problems by selecting packaging technology that fits your space and budget, streamlining your process to be more agile. Sealed Air's Fill-Air® Flow solution was designed with your operations in mind, creating a precise and consistent packaging workflow that reduces the time and energy to get products to customers as quickly as they demand.

BENEFITS OF USING FILL-AIR® FLOW

Easy To Use

- Swipe hand over sensor for amount of bags needed or adjust tether for auto replenishment.

Space Savings

- Wall mount or optional table top mount stand.
- Compact footprint allows flexibility to pack anywhere.
