
SEALED AIR[®] Brand Insulated Box Liners

TempGuard

Ship perishable goods responsibly with SEALED AIR[®] brand TempGuard, a curbside recyclable insulated box liner that protects temperature-sensitive and perishable goods in transit.

This innovative solution gives you the power to choose between a range of thicknesses and sizes to effectively deliver your products to your customers, in a sustainable way.

TempGuard is an innovative thermal liner that allows you to protect perishable goods in transit, with a sustainable, 100% curbside recyclable solution.

SEALED AIR® Brand TempGuard

- For products (chilled food, frozen food, pharmaceuticals) in transit for up to 48 hours.
- Kraft paper based outer liner, filled with 100% recycled newspaper - providing the most environmentally friendly option in the market.
 - Sealed Air treats each customer as a unique opportunity and will customize the liner size and thickness to best fit your specific needs.
- Our market leading packaging design team will work with your specific operation to customize the perfect solution to fit your business needs.
- Offered in 3 varying thickness levels, A8, A14, and A24. The right thickness level is dependent on each customer's unique shipping duration, outdoor temperature during transit, and the unique products being shipped.
